

# MyScript Notes : the missing link between your digital pen and your PC.

Vision Objects, specialized in Handwriting Recognition Technology for pen based devices, introduces MyScript Notes, the perfect tool for notes recognition.

So far your digital pen only recorded your handwritten notes and you stored them on your PC.

Now MyScript Notes turns your notes into entire digital documents that can be re-used, corrected, completed, shared.....

... because MyScript Notes

- recognizes cursive handwriting
- shapes, tables, grafics...
- respects the layout of the page
- allows edition and correction of your notes
- exports your documents in .rtf format to be opened in Microsoft Word.
- Recognizes English, French, German, Italian.

Enjoy your pen !

My Script Notes on sale at 59.95€ on

Tower of Hanoi

This is an ancient Chinese puzzle. You have three poles and a set of n disks is stacked on one of them in the decreasing order of size.

The moves may be considered as transitions from one state to another in a state space.

Move	Type
north	triangle
south	rectangle
east	circle
