The Tatung Tablet PC will make your life easier, whether at work or at play. With handwriting recognition and an onscreen keyboard, working while on the move is not a hassle. Wireless LAN allows you to get online and access information anytime, anywhere.

The Tablet PC resembles a cutting-edge "e-Book" in that it can reduce the amount of books you need to carry with you and enable active interaction between teachers and students. In the classroom, teachers can abandon the whiteboard and bring the classroom to life, using the Tatung Tablet PC and a projector.

Tatung's Tablet PC system can also benefit bankers and insurance professionals by reducing the amount of time it takes to provide services to customers, eliminating paperwork and redundancy to provide better, more efficient service to their clients.

Medical professionals, some of the most tech-savvy, can also benefit from using the Tatung Tablet PC to keep records and decrease data-entry mistakes.

With handwriting recognition, portability, and the full functionality of a desktop PC, the Tatung Tablet PC provides technology is useful for everyone!
